HTML, Cascading Style Sheets (CSS), Bootstrap, Tailwind CSS, Figma, JavaScript, React Js, Node Js, Express Js, Firebase, MongoDB, Chrome Developer Tools, Microsoft Visual Code, Git

Projects

- **Bicycle Shop** [Client-side code](#) || [Server-side code](#) || [Live website](#)
 - ✓ This website is divided into main two parts. Such that normal users and admin users.
 - ✓ Normal users can access pay, my order, and review options in the dashboard with shopping
 - ✓ Admin users can access manage all products, add products, make admin and manage products options in the dashboard. Firstly, for the dashboard option, all users need to register or log in.
- **Photo Album** [Client-side code](#) || [Server-side code](#) || [Live website](#)
 - ✓ The photo album is a social website like Instagram. But this website has a lot of differences from Instagram or any social website.
 - ✓ You can create your profile or edit and upload any pic.
 - ✓ Nice user interface and user friendly.
- **Food Delivery** [Client-side code](#) || [Server-side code](#) || [Live website](#)
 - ✓ This website work like a hub. That means this website establish the connection between restaurant and customers.
 - ✓ Customers can order any food from any choice-able restaurant. Before accessing the ‘place order’ option customers need sing-in by the Google sign-in option.
 - ✓ And restaurant owners can add a restaurant also their available products after properly sign-in using Google.
